Western Placer Unified School District

MASTER PLAN

Master Plan Implementation

The Master Plan presented herein is the product of this process and the contributions of the entire Planning Team of educators, administrators, specialists and architects. In summary, this plan recommends a broad mixture of modernization and new construction, building additions and site reconfiguration and demolition, removal of portables and some change of use via re-organization and re-assignment of use. While comprehensive and difficult with temporary displacements, it is a complete plan that is feasible in four phases of differing complexity.
